TOM's CAN BE IDENTIFIED BY EITHER HEAD OR CANDY KICKER CHARACTERISTICS.

SORTING BY HEAD CHARACTERISTICS IS STRAIGHT FORWARD IN THAT MOST COLLECTORS ARE GENERALLY FAMILIAR WITH PEZZY HAIR, EYE AND FACIAL FEATURES

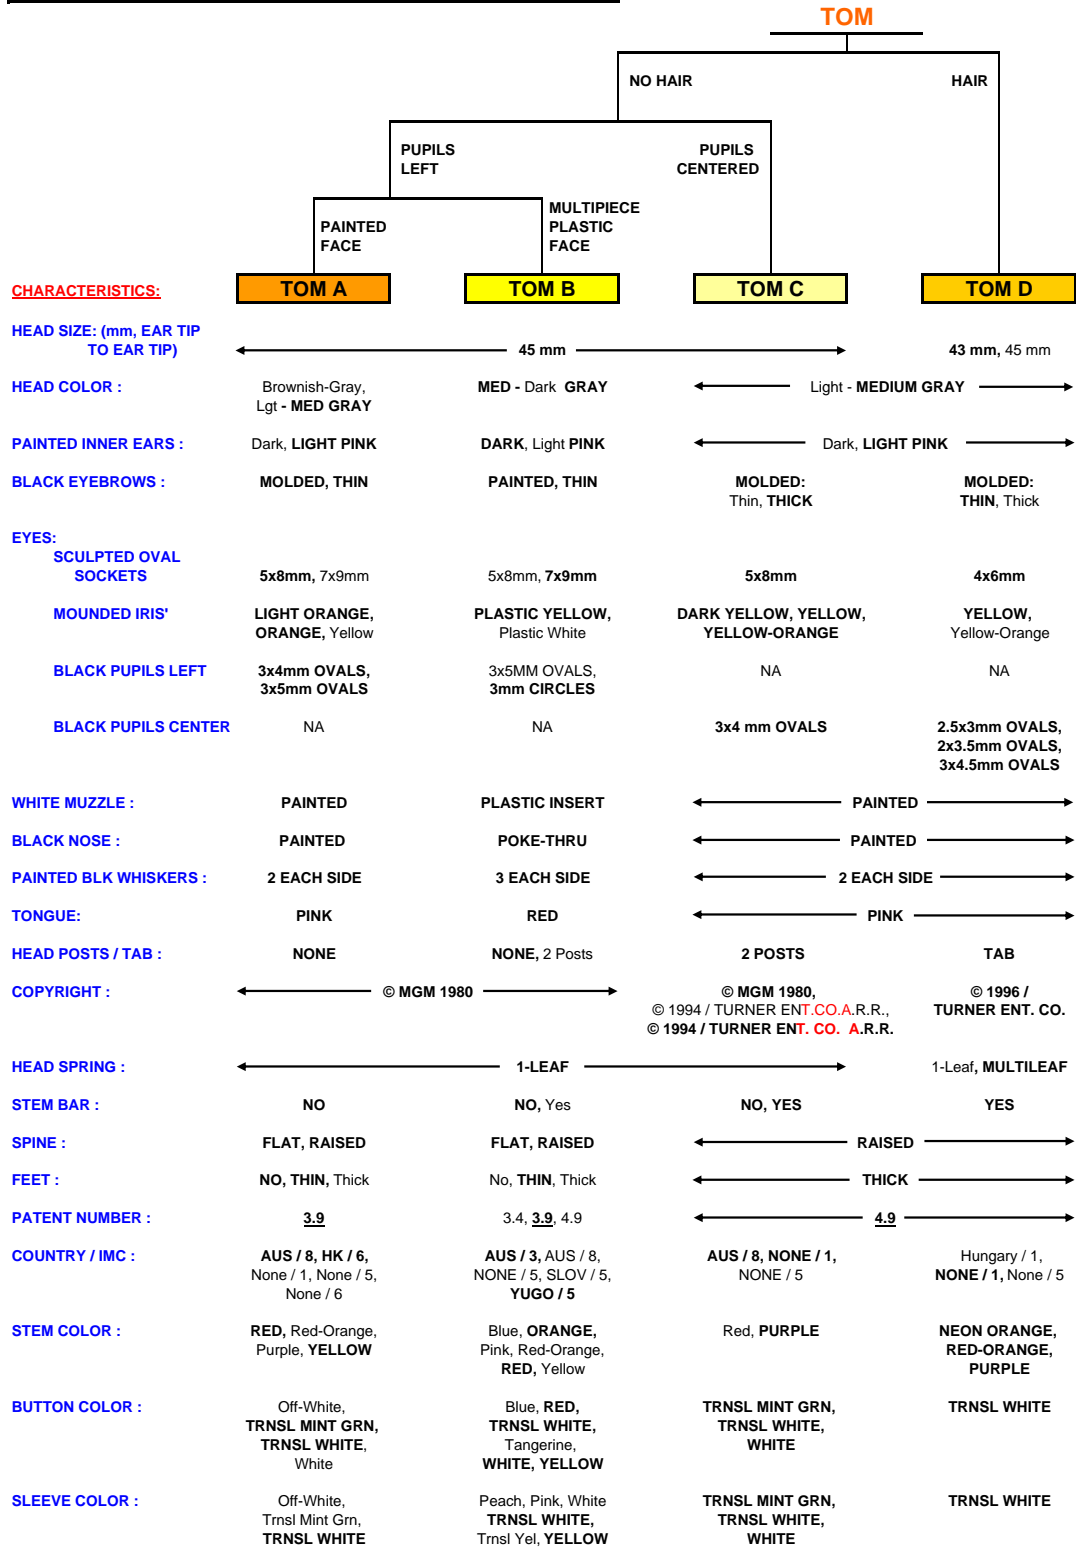

SORTING BY KICKER CHARACTERISTICS COULD BE CONFUSING IF COLLECTORS ARE NOT AS FAMILIAR WITH KICKER FEATURES; COMPARING ACTUAL TOM KICKERS TO CHART DESCRIPTIONS SHOULD HELP RESOLVE CONFUSION

COMBINING THE CHARTS FOR QUICK AND EASY ID CRITERIA:

TOM A	PAINTED FACE & SMOOTH KICKER w/ ROUNDED TIP
TOM B	MULTIPIECE PLASTIC FACE
TOM C	POST AT TOP OF KICKER
TOM D	HAIR

TWEETY BIRD ID CHART

OVERVIEW
Eye sockets w/ pupils = Tweety A
Eye sockets w/o pupils = Tweety B
No eye sockets, sunken lashes = Unlisted Tweety
Smooth head w/o hat = Tweety C
Smooth head w/ hat = Charming Tweety

DEFINITIONS
A PUPIL is a small cavity or hole in the center of a Tweety A eye; look for it at a low angle under a bright light.
An IRIS is the colored part of the eye and is yellow or blue for Tweety eyes.
An eye WHITE is the part of the eye that surrounds the iris. It is removable on Tweety A eyes ; look inside Tweety's head to see the protruding posts that hold the whites in place.
A SUNKEN EYE is an eye set in an EYE SOCKET . The socket is deep and well defined for both Tweety A's and for Decal Tweety B; it is shallow for Painted Tweety B and is completely missing from subsequent issues.
